

Company

Terichem is the joint venture of Finnish company Ab Rani Plast Oy and the Slovak company Chemsovit, with production sites in Slovakia, Finland and Ukraine. It has over 80 years of history in packaging film and BOPP film production in Slovakia and Finland, creating the foundations on which Terichem was built.

Terichem has operated in the global market of BOPP film manufacturers and suppliers under the brand name Tatrafan since 2017. It manufactures packaging for tobacco, food, capacitor production and other applications such as flowers and gifts. The division for BOPP film for production of capacitors is separate and operates today under the brand Tervakoski film.

- Location: Slovakia, Ukraine and Finland
- Industry: Plastic Film
- Products and Services: Packaging film and BOPP film
- Annual production: 17,000 tonnes
- Employees: 280
- ERP System: SAP

Objectives

- Integrate X-Trim with Tatrafan's ERP system, SAP

Implemented Solutions

- X-Trim

Benefits

- Reduction of trim waste
- Optimisation of knife changes
- Waste minimisation
- Minimisation of number of patterns

"We were very happy to continue on from the successful pilot project and move Greycon's state-of-the-art optimising tool into daily production at Tatrafan. It is the combination of the various efficiency improvements such as waste minimisation, optimisation of knife changes, minimisation of number of patterns as well as managing different winder types combined with the easy-to-use trim solution which make a difference in Tatrafan's daily production processes."

Martin Lach
Managing Director
Tatrafan
